* Module 1: Intro and setup

Data science :- collective name for all sciences

Data handling :- moving & transforming data to usable form and structure

Pandas :- fast, efficient, open source.

1) Data Science Basics

- Combines programming, statistics, and data analysis
- Find insights from data to help decisions
- Used in business, AI, healthcare, finance
- Workflow: Collect → Clean, → Analyze → Visualize

2) Anaconda Cloud & Jupyter notebook

- Anaconda Cloud: Online DS tools platform.
- Jupyter notebook: Run python code interactively, show results & visuals

3) Anaconda distribution

- All-in-one python package with libraries & tools
- Simplifies setup for beginners.

4) Conda, Package manager

- Manages packages & project environments
- Install / update safely
- Prevent version conflicts.
